

NX IBC pump

The NX[®] IBC pump
Suitable for use with standard 1000 litre IBC tank.
Available with various fittings.

Easy Glide Pumping Action:

The pistonless displacement method of operation means there are minimal moving parts to inhibit the performance of the pump, with low internal friction.

Anti-drip Nozzle Feature:

Alleviates the problems of drips by simply rotating the nozzle upwards thus closing the product-flow pathway.

Continuous Dispensing Action:

The design of the NX IBC Pump helps reduce the time it takes to dispense product from the IBC easily and efficiently, pumping on both “up” and “down” strokes

Excellent Chemical Resistance:

Manufactured 100% from food-grade polypropylene components and is suitable for a wide range of chemicals including oils, resins, acids, alkalis, chlorine-based, etc.

Particulates / High Viscosity:

The design of the NX pump allows particulates to be pumped without blocking, and can pump high viscosity liquids, including eg. molasses

2-Year Manufacturer's Warranty:

Our confidence in the product is such that we offer a full 2 Year Warranty.
