e.g. SBP-10-2

Packaging	Size 1	Size 2
	25 at 4kg	25 at 8kg

Features & Information

- The WRAS approved and BS6920 compliant SB range contains no metal components, meaning standard bags can be recycled or disposed of simply by incineration
- Standard felt bags are of welded construction, where the bag fabric is fused together to create a strong seal, reducing the possibility of loose, fibrous edges migrating downstream
- Available in bag sizes: 1 and 2
