

'BACON' SAMPLING VESSELS

These consist of a heavy nickel-plated brass container for non-pressurised sampling with a bottom opening valve which can be opened at any depth by an actuating cord, or self-actuated when the valve or its extender rod strikes the bottom of the storage tank. Equipped with valve-stem locking device. Various lengths of rod are available to open the valve at different distances off the bottom. Approximate capacities listed.

21711-0 SETA BACON SAMPLING VESSEL - 1 litre
