

CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH

PRODUCT: Red Spirit, Green Spirit, Blue Spirit
Thermometer Filling

REFERENCE: PROPYLENE GLYCOL DIACETATE

DESCRIPTION: Propylene Glycol Diacetate is a colourless mobile liquid of characteristic odour.

TOXICITY: This product can be classed as non-toxic under normal conditions. Propylene Glycol esters are permissible for use as foodstuff additives under existing legislation. However, in case of accidental ingestion, medical advice should be sought.

STORAGE: No special precautions necessary.

HANDLING: Propylene Glycol Diacetate is a pronounced solvent and degreaser. Prolonged contact with the skin should be avoided and, therefore, rubber or P.V.C. gloves should be worn. Spillage on the skin or clothing should be washed away by irrigation with water, in which the solvent is partly soluble.

SPILLAGE: Propylene Glycol is soluble in water to the extent of approximately 12% and thus spillage on equipment and workshop floors etc., can be washed down with copious amounts of water.

FIRE HAZARD: The product is combustible and has a flash point of approximately 85C open cup. No special precautions are necessary and fire can be treated with water or foam.

IN EMERGENCY - NOTIFY POLICE AND FIRE BRIGADE IMMEDIATELY
